GCSE – NEW

3500U30-1

**COMPUTER SCIENCE – Unit 3
Software Development Task**

1 SEPTEMBER 2018

20 hours

**AVAILABLE ONLY TO CANDIDATES ENTERING THE WJEC
QUALIFICATION APPROVED BY QUALIFICATIONS WALES AND NOT
AVAILABLE TO CENTRES IN ENGLAND**

INSTRUCTIONS TO CANDIDATES

You have 20 hours to complete your task.

Read the Information and Task sheets carefully to make sure you understand what is needed.

It is important that you work independently from other candidates and make sure what you produce is your own unaided work.

Candidates should complete a refinement log as described overleaf, explaining any issues encountered and resulting refinements to the original design.

Check your work carefully to make sure that the work you produce is accurate and correct.

INFORMATION FOR CANDIDATES

The quality of your written communication, including appropriate use of punctuation and grammar, will be assessed in your report.

Teachers and candidates will be required to sign a declaration that all work presented is the work of the candidate alone.

Guild of Ceramic Arts

The Guild of Ceramic Arts was founded in 2015 to support ceramic artists to share professional opinions, generate new ideas and spread best practices throughout the industry.

The Guild is also a trade association that organises training events and sells supplies to the several hundred registered guild members. The Guild sells items such as kilns, glazes, bisque pottery, clay and ceramics.

Guild members can view items from the Guild's web site or quarterly catalogue and order the chosen products by telephone or email.

The Guild has a standard delivery charge of £5.99 for all orders however large or small. All orders are dispatched with an invoice and payment must be made within 28 days of the date of the invoice.

All orders of over £50.00 not including the delivery charge will receive a 5% discount.

If an order is cancelled then the Guild member or craft business will be charged 20% of the cost of the goods to cover administration and the return of the items to the warehouse.

You have been asked to create an application that will allow the user to:

- Enter and store the details of the Guild members
- Enter and store the products for sale
- Enter and store Guild member's orders
- Create and store an invoice for each order
- Produce replacement invoices for cancelled orders
- Check for unpaid invoices that are over 28 days old

To produce the application, you should:

- analyse the given information
- design a solution to the given problem
- program the solution to the given problem
- test and refine the application, noting the refinements in your refinement log
- evaluate your application.

Produce a report that includes the sections of work included on the Tasks page. Your report should be about 2,000 words.

THE GUILD OF CERAMIC ARTS

Bisque is a true **ceramic** material. **Bisque** refers to ware that has been fired once, and is ready to be decorated or glazed.

Bisque Mug	PT21234	£3.30 plus VAT
Bisque Santa Ornament	PT32676	£1.68 plus VAT
Bisque Elephant Money Box	PTH042	£6.96 plus VAT
Bisque Sitting Puppy Bank	PT21444	£2.40 plus VAT
Bisque Starfish	PT37485	£4.96 plus VAT

Tasks

Refinement log [5 marks]

Complete your refinement log as you work through the project.

A copy of the refinement log is included in this document.

Complete your refinement log to show that you have:

- carried out the activities in the correct order
- recorded your progress in each session
- described any problems you have had in carrying out your work in each session
- justified any changes to the original design that have to be made because of problems encountered
- identified logical priorities for actions in the next session.

Make sure you have completed your refinement log every session.

Scope of the Problem [8 marks]

Read the information given in the scenario about the Guild of Ceramic Arts and its requirements.

Produce a document that:

- clearly summarises the purpose of the project
- identifies the data required to create the application
- identifies the processing to be carried out by the application
- identifies the required outputs from the application
- provides objectives for the project that are manageable and clearly identify the tasks that the application must perform to solve the problem.

Make sure you have completed your refinement log.

Design [12 marks]

Produce a design for the application that includes:

- input and output facilities to be provided by the user interface
- suitable data structures to enable the application to carry out the required tasks
- proposals for validation rules to control data input and limit errors
- designs for input formats including features to aid data entry
- designs for outputs including the intended layout of reports to be generated by the application
- designs for authentication routines
- processing stages as algorithms using standard conventions such as pseudo code or flowcharts.

Make sure you have completed your refinement log.

Effectiveness of Solution [15 marks]

You need to make sure that the finished application:

- is functional and fulfils all the requirements of the Guild of Ceramic Arts
- has an interface that is easy to use
- is modular and makes efficient use of resources
- has authentication routines
- is reliable and robust.

Make sure you have completed your refinement log.

Technical Quality [20 marks]

You need to make sure that you have written code which:

- is self-documenting and well structured
- uses a consistent style throughout including indentation and use of white space
- uses meaningful identifiers and appropriate constants
- uses local variables to minimise the use of global variables
- has validation routines and can handle errors such as division by zero
- has informed annotation to demonstrate your understanding of the solution.

Make sure you have completed your refinement log.

Test Strategy [8 marks] and Testing [8 marks]

You need to plan and carry out testing of your application. Remember to use your Refinement Log to identify problems solved in the development of your application.

Produce a document for this section of the work that shows you have:

- considered your application when developing your test strategy
- provided a description of the test strategy in terms of tests and data to be used
- considered how the outcomes of your testing might identify areas for further development
- produced a detailed test plan
- designed appropriate test data
- followed your test plan in a logical and systematic way
- used a full range of test data
- presented your testing outcomes with detailed commentaries
- used accurate grammar, punctuation and spelling.

Make sure you have completed your refinement log.

Further Development [4 marks]

Produce a Further Development document which:

- considers the outcomes of the testing process in terms of how well the application meets the objectives set at the beginning of the project
- describes the good features of the application and identifies areas for further development
- provides detailed suggestions for specific extensions to the application.

Make sure you have completed your refinement log.
