Charlie has just started at a new school. He has become friendly with a group of boys in his year group. Charlie thinks they are ‘cool’.

One day, one of the more popular boys in the group suggests they all wear their school jumpers inside-out for a week, ‘just to see what will happen’. Charlie worries about this all night but still goes to school the following day wearing his jumper inside-out.

Use your knowledge of conformity to explain Charlie’s behaviour. [6 marks]

03

Later that day, the headteacher calls each of the boys in the group to his office one-by-one, including Charlie.

He explains that the school jumper should not be worn inside-out, and that a detention will be given to any boy who disobeys. From then on, each boy wears their jumper correctly.

Use your knowledge of obedience to explain the boys' behaviour. [6 marks]

SECTION B**MEMORY**

Answer ALL questions in this section.

0	5
----------	----------

A researcher wanted to test if there is a relationship between the passage of time and recall of nonsense words. They gave 30 participants 40 nonsense words to learn, then tested recall at fixed intervals over several weeks. The nonsense words were standardised to ensure they were of similar difficulty and length.

When writing up the investigation, the researcher represented their data on a scattergram.

Briefly explain how the use of inferential statistics would improve this investigation. [3 marks]

Two police officers are discussing the testimony of an eyewitness. The eyewitness had described a robbery she had seen.

‘At first, the witness said she was convinced the suspect was wearing glasses and had a limp,’ explained one of the officers, ‘but later she said she may have just been repeating what she’d heard from other witnesses.’

‘I’m not sure we’re going to be able to use her statement,’ replied the other officer.

Discuss the effect of post-event discussion on the accuracy of eyewitness testimony. Refer to the information above in your answer. [8 marks]

SECTION C**ATTACHMENT**

Answer ALL questions in this section.

---	---

Zara's baby, Sunta, is a few weeks old.

The rest of the family laugh along as Zara sticks her tongue out at Sunta and Sunta does the same thing back to her.

Which feature of caregiver-infant interaction does this example illustrate? [1 mark]

1	1
---	---

The rest of the family also think it's cute when Zara rocks Sunta to sleep and their heads seem to move in time with one another.

Which feature of caregiver-infant interaction does this example illustrate? [1 mark]
