## **MATERIALS**

**For this paper you must have:**

- **the AQA Formulae for A-level Mathematics booklet**
- **a graphical or scientific calculator that meets the requirements of the specification.**

## **INSTRUCTIONS**

- **Use black ink or black ball-point pen. Pencil should only be used for drawing.**
- **Answer ALL questions.**
- **You must answer each question in the space provided for that question.**
- **If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).**
- **Do NOT write on blank pages.**

- **Show all necessary working; otherwise, marks for method may be lost.**
- **Do all rough work in this book. Cross through any work you do not want to be marked.**

## **INFORMATION**

- **The marks for questions are shown in brackets.**
- **The maximum mark for this paper is 80.**

## **ADVICE**

- **Unless stated otherwise, you may quote formulae, without proof, from the booklet.**
- **You do not necessarily need to use all the space provided.**

**DO NOT TURN OVER UNTIL TOLD TO DO SO**

**SECTION A**

**Answer ALL questions in the spaces provided.**

- 1** It is given that  $\tan \theta^\circ = k$ , where  $k$  is a constant.

**Find  $\tan (\theta + 180)^\circ$**

**Circle your answer. [1 mark]**

$-k$                        $-\frac{1}{k}$                        $\frac{1}{k}$                        $k$

2 Curve C has equation

$$y = \frac{1}{(x-1)^2}$$

State the equations of the asymptotes to curve C

Tick (✓) ONE box. [1 mark]

$x = 0$  and  $y = 0$

$x = 0$  and  $y = 1$

$x = 1$  and  $y = 0$

$x = 1$  and  $y = 1$

[Turn over]

3 Express  $\frac{\sqrt{3} + 3\sqrt{5}}{\sqrt{5} - \sqrt{3}}$

in the form  $a + \sqrt{b}$ ,

where  $a$  and  $b$  are integers.

Fully justify your answer.  
[4 marks]

**4 (b) Deduce all solutions of the equation**

$$\sin 3\alpha \tan 3\alpha = 4 \cos 3\alpha$$

**where  $0^\circ < \alpha < 180^\circ$**

**Give your answers to the nearest degree. [3 marks]**

---

---

---

**5** A student is looking for factors of the polynomial  $f(x)$

They suggest that  $(x - 2)$  is a factor of  $f(x)$

The method they use to check this suggestion is to calculate  $f(-2)$

They correctly calculate that  $f(-2) = 0$

They conclude that their suggestion is correct.

**5 (a)** Make ONE comment about the student's METHOD. [1 mark]

---

---

---

---

**5 (b) Make TWO comments about the student's CONCLUSION. [2 marks]**

## SECTION B

Answer ALL questions in the spaces provided.

13

A particle is moving in a straight line with constant acceleration  $a \text{ m s}^{-2}$

The particle's velocity,  $v \text{ m s}^{-1}$ , varies with time,  $t$  seconds, so that

$$v = 3 - 4t$$

Deduce the value of  $a$

Circle your answer. [1 mark]

14

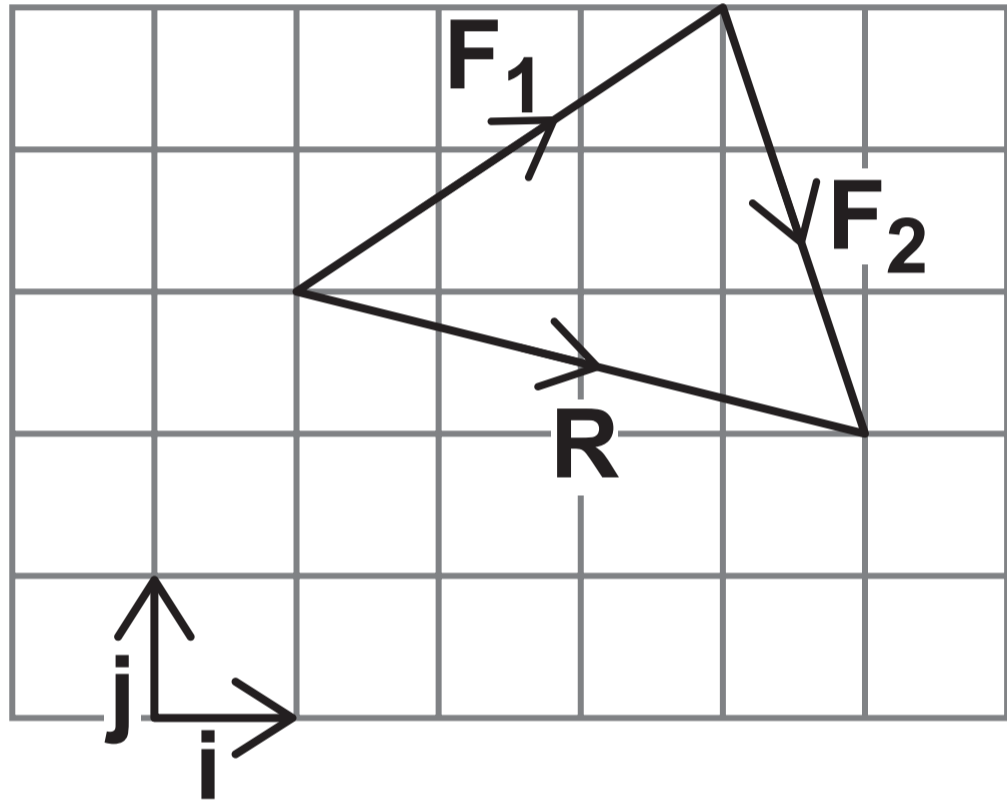

Two forces,  $F_1 = 3i + 2j$  newtons and  $F_2 = i - 3j$  newtons, are added together to find a resultant force,  $R$  newtons.

This vector addition can be represented using a diagram.

Identify the diagram below and on the opposite page, which correctly represents this vector addition.

Tick ( $\checkmark$ ) ONE box. [1 mark]

[Turn over]

15

A graph indicating how the velocity,  $v \text{ m s}^{-1}$ , of a particle changes with respect to time,  $t$  seconds, is shown below.

15 (a)

Find the total distance travelled by the particle over the 8 second period shown.  
[3 marks]

---

---

**15 (b) A student claims that**

**“The displacement of the particle is less than the distance travelled.”**

**State the range of values of  $t$  for which this claim is true.  
[1 mark]**
